

(T2100) SUSÁMEE – TAHINI (WHOLEGRAIN) FROM LIMNOS ISLAND (v.2020)

TAHINI is a 100% natural spread, made of peeled, roasted, ground sesame seeds

USP Our tahini is produced and packed in Lemnos island (Greece) from 100% Greek wholegrain sesame seeds (no imported sesame). This detail makes all the difference in the taste, the after-taste and the texture. In general tahini is extremely nutritious. It is a perfect alternative for peanut butter and a great substitute for animal protein. It has a high content in vitamins (B1 and B2), calcium, iron, phosphorus, copper, Omega 3 and fatty acids.

SERVE on toasted bread, plain or mixed with honey. Make hummus and halvah. Use it in salad dressings, sauces, cookies, cakes and Vegan ice-cream. Mix it with coca and honey for a healthy chocolate spread.

AWARDS Great Taste Award 2020 (UK) 2 stars

A glossy tahini, flecked with the sesame seeds. Much darker and more intense than your usual tahini, with deep toasted notes. There is no comparison with the majority of examples you can pick up in a supermarket. This is streaks ahead. There is the usual snap of bitterness just after you pop it in your mouth, but this quickly fades into the background when the roasted flavour appears back on the finish. A delightfully nutty taste, with a smooth and velvety texture that has great mouthfeel. This is tahini with attitude.

Deeply aromatic, redolent of sesame. Rich and unctuous tahini, smooth and rich in its texture. Full-bodied, the tahini coats the mouth as you would expect, delivering a lasting roasted sesame flavour. This would form the basis of so many great dishes or snacks. A super product!

CERTIFIED: Non-GMO, VEGAN

INGREDIENTS 100% wholegrain ground SESAME seeds

ALLERGENS SESAME

ZERO trans fat, salt

BOX 6 jars x 200g (all packaging material is recyclable)

PALLET 384 boxes (2304 jars)
